Open-E storage software includes the following Adaptec components:

- device drivers to support Adaptec RAID
- management services to remotely manage Adaptec RAID via Adaptec Storage Manager (ASM)

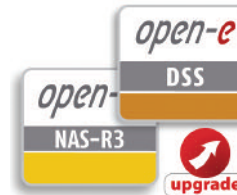

Open-E iSCSI-R3 offers the highest data throughput, latency and performance by supporting multiple network connections, Fibre Channel (Initiator) and up to 32 CPUs.

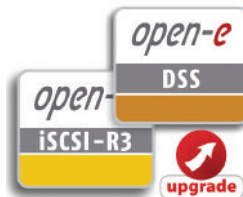

Open-E NAS-R3 offers NAS (Network Attached Storage), iSCSI (Initiator), Fibre Channel (Initiator), Backup to Tape, Backup to Disk (Virtual Tapes) and Data Replication.

Open-E DSS, an all-in-one-storage software, which offers Network Attached Storage (NAS), iSCSI and Fibre Channel (Initiator and Target) in one central management interface.

License Key - upgrade NAS-R3 to DSS extends Network-Attached Storage (NAS) functionality of your product with additional Storage Arena Network (SAN) functions, creating real Data Storage Server. Only one reboot is required, limiting downtime, administration overshoot and total costs of ownership (TCO).
